The right surroundings are decisive for the success of your banners!

Display advertising remains an important component in the marketing mix. Its importance is equal to the importance of print and social media. A banner's relevance to its thematic environment is an essential factor. Studies around the globe prove that when banners are relevant to the article that the user is reading, then the reader's acceptance and interest are strongly and positively influenced, and the advertised product is more lastingly retained in the reader's memory and mindset. At gitarrebass.de, you have the opportunity to present your products in thematically relevant, search-engine-optimized surroundings. You can even combine your banners with matching keywords so the banners appear only if the keyword is present in the URL or in the text.
